Foreword

The Annual Statistical Review provides comprehensive information on current economic and social conditions on Prince Edward Island. I am pleased to present the *2002 Annual Statistical Review*, which is the 29th edition.

The review contains the more frequently consulted socio-economic information on the province and is an important reference for those interested in the Prince Edward Island economy and its people. More than 100 statistical tables provide historical and current data at the provincial level and in some cases at sub-provincial levels. The publication also contains a descriptive narrative on the economic performance of the province in 2002 and a redesigned section entitled Key Facts About Prince Edward Island.

Additional statistical information can be accessed through the Prince Edward Island government Web site at ***www.gov.pe.ca***. In addition to timely general information about Prince Edward Island, the site contains the *Prince Edward Island Economic Progress Report*, monthly updates of key economic indicators, data regarding the *2001 Census of Population* and *2001 Census of Agriculture*, population data, as well as an interactive map of Prince Edward Island, which highlights community profiles.

The *Annual Statistical Review* was prepared by the staff of the *Economics, Statistics and Federal Fiscal Relations Division* in the PEI Department of the Provincial Treasury. The statistics are drawn from a variety of sources, including *Statistics Canada* and Provincial Government departments.

If you have any suggestions, comments, or statistical inquiries, please contact the staff of the *Economics, Statistics and Federal Fiscal Relations Division* at (902) 368-4030.

Patricia J. Mella
Provincial Treasurer

A Historical Note

Before the European explorations, the island was frequently used by Mi'kmaq Indians for fishing, hunting and some planting. The Mi'kmaq called the island *Epekwitk*, meaning "the land cradled on the waves." Europeans later changed the pronunciation of the name to *Abegweit*. Historians credit the European discovery of the island to Jacques Cartier, the French navigator, who claimed the island for Francis I, King of France, on July 1, 1534. In 1720 the island, then called *Île Saint Jean*, was colonized by 300 French settlers, sponsored by a commercial company of the Comte de Saint Pierre. The island was ceded to Great Britain in 1763. Two years later the designated capital city of the *Island of St. John* took on the name *Charlotte Town* in honour of Queen Charlotte, wife of King George III of England. In 1799 the colony was renamed Prince Edward Island in honour of Edward, Duke of Kent, who was then commander of the British forces in North America. Prince Edward Island is known as the "Cradle of Confederation", because the Charlottetown Conference, held there in 1864, initiated the movement toward Canada's federation. The island became a province in 1873.

The Armorial Bearings[1] of the Province of Prince Edward Island, shown at left, were proclaimed to come into force on December 13, 2002. The centrepiece is the Shield of Arms, granted by King Edward VII in 1905, featuring the English heraldic lion, a large oak tree on the right and three young saplings on the left. The mature tree originally represented England, while the three saplings stand for the three counties – Kings, Queens and Prince. Scrolled along the bottom of the Shield of Arms are the Latin words *Parva Sub Ingenti*, which, when translated, read: *The small under the protection of the great*. The surrounding elements of the Armorial Bearings illustrate significant characteristics of the province, its position in the Canadian federation, its founding peoples and its natural resources.

[1] Descriptions of the Armorial Bearings on this page and the provincial flag, flower, tree and bird found on the next two pages adapted from the government publication *The Symbols of Prince Edward Island*.

Key Facts About Prince Edward Island

Land area	5,684 km^2
Total area of farms (46% of land area)	646,137 acres
Population (July 1, 2002, preliminary)	139,913
2001 Census count (15 May, 2001)	135,294
Number of households (2001 Census)	50,795
Urban population (2001 Census)	60,675
Rural population (2001 Census)	74,619
Farm population (1996 Census)	7,805
Non-farm population (1996 Census)	67,290
Francophone population (2001 Census)	5,665
Population density per km^2	24

Counties and their populations (July 1, 2002, preliminary):

Kings County (area: 1,684 km^2)	19,880
Queens County (area: 2,020 km^2)	74,585
Prince County (area: 1,980 km^2)	45,448

Population of selected Island communities (2001 Census):

Cities:	Charlottetown (incorp.1855)	32,245
	Summerside (incorp.1877)	14,654
Towns:	Cornwall	4,412
	Stratford	6,314
	Georgetown	721

Population by Federal Electoral Districts:

Cardigan	30,437
Egmont	35,198
Hillsborough	35,252
Malpeque	34,407

Population by Census Agglomeration (CA):

Charlottetown	58,358
Summerside	16,200

Provincial Flag

The design of the Prince Edward Island flag is modelled after the Coat of Arms in rectangular shape and is bordered on the three sides away from the mast by alternate bands of red and white.

Provincial Flower

The Lady's Slipper was adopted as the provincial flower on April 25, 1947. The orchid gets its name from the shape of its petals, which form a pouch somewhat like a slipper.

Provincial Tree

The Red Oak was adopted as the provincial tree in 1987. At one time the Red Oak was widely distributed in the hardwood areas of the province. It was used in shipbuilding and making barrels for dry goods.

Provincial Bird

During the 1977 session of the PEI Legislative Assembly, the Blue Jay was officially named the provincial bird. It was chosen after a province-wide public vote held during Environment Week in 1976. Winter is the ideal time for sighting the Blue Jay, its shrill cries cutting the silence of the crisp winter air.

Economic Review 2002

Overview

As a result of the strong recovery in the potato production, a buoyant residential construction sector and solid growth across most sectors, the Prince Edward Island economy performed well in 2002. Statistics Canada estimates that the provincial economy expanded by 5.6 per cent in constant dollars following no growth in 2001. This expansion was the second largest in the country. Economic performance in 2001 was negatively effected by a severe drought, which reduced potato and other crop yields. The value of Prince Edward Island's Gross Domestic Product (GDP) at market prices for 2002 is estimated to be $3,767 million. The national economy expanded by 3.4 per cent in 2002, up from 1.5 per cent a year earlier.

Statistics Canada's estimates of GDP indicate that in 2002 the leading growth sectors in the province were: fishing (up 23.1 per cent), agriculture (up 20.2 per cent), information and culture services (up 9.1 per cent), construction (up 9.1 per cent), business services (up 7.9 per cent) and manufacturing (up 7.5 per cent).

The general rise in consumer prices in 2002, as measured by the *All-Items Consumer Price Index* (CPI), for Prince Edward Island was 2.7 per cent, up 0.1 percentage point from 2001. Leading factors contributing to this rise were sharp increases in the price of motor vehicle insurance premiums (up 39 per cent) and cigarettes (up 29 per cent). Energy prices were 4.8 per cent lower in 2002 than 2001. Prices increased, on average, by 2.2 per cent in 2002 in Canada.

Employment on Prince Edward Island expanded by 1.8 per cent in 2002 to average 67,100 employed per month, an all-time high for the province. These employment gains translated into total labour income growth of 6.3 per cent in 2002. The unemployment rate averaged 12.1 per cent in 2002, slightly higher than the 11.9 per cent recorded a year earlier, largely as a result of high labour force participation.

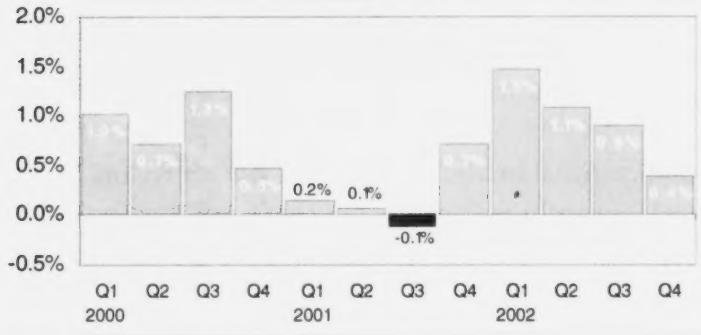
After a modest increase of 1.5 per cent in 2001, the value of manufacturing shipments on Prince Edward Island bounced back strongly in 2002 with an increase of 9.5 per cent, to value $1,316 million. This was slightly lower than the average annual growth rate of 12 per cent since 1996.

The economic performance of Prince Edward Island is discussed in further detail following a brief analysis of the national economy in 2002.

The Canadian Economy

In 2002 the Canadian economy outperformed all industrialized countries, posting 3.4 per cent growth in real GDP. This compares to 2.4 per cent growth in the United States, 1.5 per cent among OECD members, and 0.8 per cent in the European Union. Canada's resilience in the face of global uncertainties is attributed to strong domestic demand and effective monetary and fiscal measures.

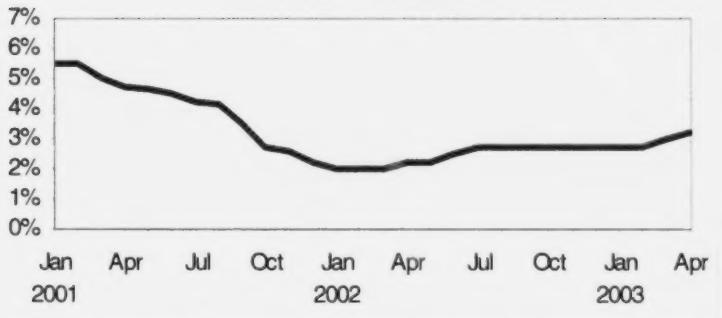
Diagram 1
QUARTERLY REAL GDP GROWTH
CANADA



Source: Statistics Canada.

Diagram 1 shows quarterly real GDP growth between 2000 and 2002. It indicates that, after weak growth in 2001, the national economy strengthened through 2002. The surge in economic growth in 2002 waned at year end, when fourth-quarter GDP slowed to a 0.4 per cent gain in volume after three consecutive quarters of growth averaging over 1 per cent. Overall in 2002, Canada's economy posted real GDP growth of 3.4 per cent, significantly higher than the 1.5 per cent attained in 2001. The expansion, measured in 1997 dollars, was led by consumer spending (up 2.9 per cent) followed by gross fixed capital formation (up 2.5 per cent) and government expenditures (up 2 per cent). It is noticeable that the role of international trade was modest in 2002, in contrast to the performance in the 1990s.

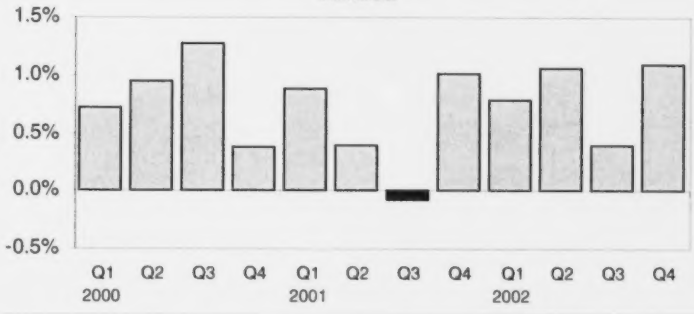
Diagram 2
BANK OF CANADA
OVERNIGHT TARGET RATE



Source: Statistics Canada.

Concern over inflationary pressures and an overheating economy caused the *Bank of Canada* to raise its target for the overnight lending rate three times during 2002: from 2 per cent in January 2002 to 2.25 per cent in April, 2.50 per cent in June, and 2.75 per cent in July 2002. During the first four months of 2003 the bank's key overnight rate was raised twice: to 3 per cent on March 4 and 3.25 per cent on April 15. Diagram 2 illustrates the course of the overnight target rate from 2001.

Diagram 3
REAL PERSONAL EXPENDITURES, Quarterly
Canada

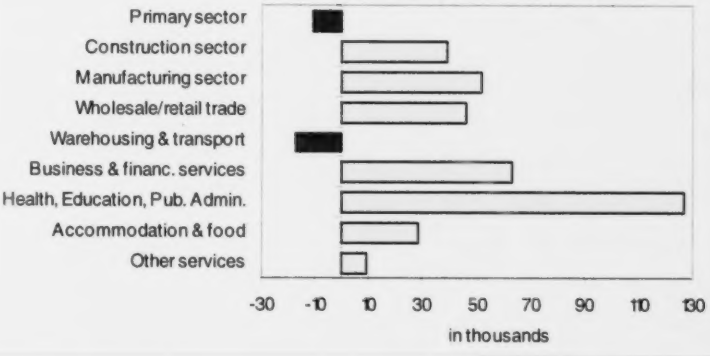


Source: Statistics Canada.

Diagram 3 shows quarterly personal expenditures in real terms between 2000 and 2002. As can be seen, consumer spending rebounded in the last quarter of 2001 and through 2002, as a result of relatively low interest rates, which reduced mortgage rates and the cost of consumer credit. This resulted in a 2.9 per cent annual growth rate in real consumer spending in 2002. Measured in current dollars, total personal expenditures on goods and services rose from $621 billion in 2001 to $651 billion in 2002, an increase of 4.9 per cent. Current dollar spending on durable and semi-durable goods increased by 5.8 per cent, while non-durables and services increased by 5.2 and 4.4 per cent, respectively.

Largely as a result of lower energy costs, the average Canadian inflation rate, as measured by the *All-Items Consumer Price Index*, fell from 2.6 per cent in 2001 to 2.2 per cent in 2002. The core inflation rate, i.e., the All-Items Index with the effects of energy and food prices removed, rose from 2 per cent in 2001 to 2.7 per cent in 2002.

Diagram 4
CANADA EMPLOYMENT GROWTH, 2002



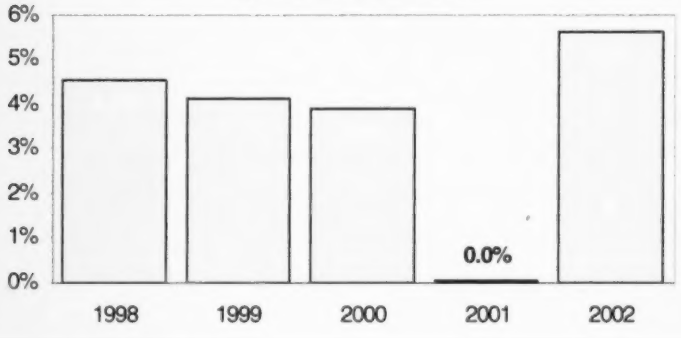
Source: Statistics Canada.

In 2002 national employment increased from 15.1 million in 2001 to 15.4 million in 2002, an increase of 2.2 per cent. Diagram 4 shows that most job creation occurred in the service-providing sector, especially in the health, education, and public administration sectors. In the goods-producing sector the loss of employment in the primary sector was offset by an increase in manufacturing and construction employment. The national unemployment rate rose to 7.7 per cent in 2002 from 7.2 per cent a year earlier.

The Prince Edward Island Economy

Gross Domestic Product

Diagram 5
ANNUAL GROWTH IN GDP (in chained 1997 $)
Prince Edward Island

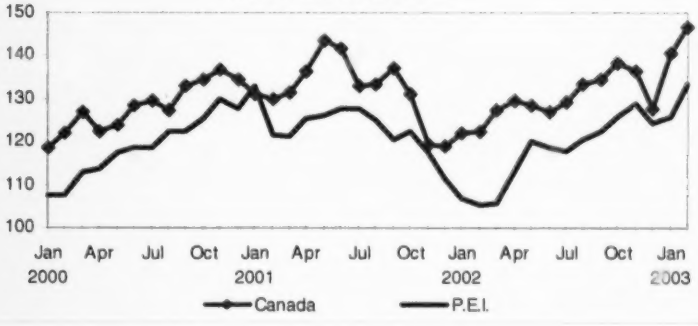


Source: Statistics Canada

Statistics Canada's preliminary estimates indicate that the Prince Edward Island economy expanded by 5.6 per cent in 2002, after experiencing virtually no growth in 2001, largely as a result of the impact of the drought on the potato harvest. Diagram 5 shows percentage gains in provincial GDP since 1998. The value of provincial GDP at market prices for 2002 is estimated at $3,767 million. Growth in 2002 was highlighted by the recovery in potato production, growth in manufacturing and business services, a buoyant residential construction sector, improvements across most sectors, and rising employment.

Consumer Prices

Diagram 6
ENERGY PRICE INDEXES (1992=100)
CANADA AND P.E.I.

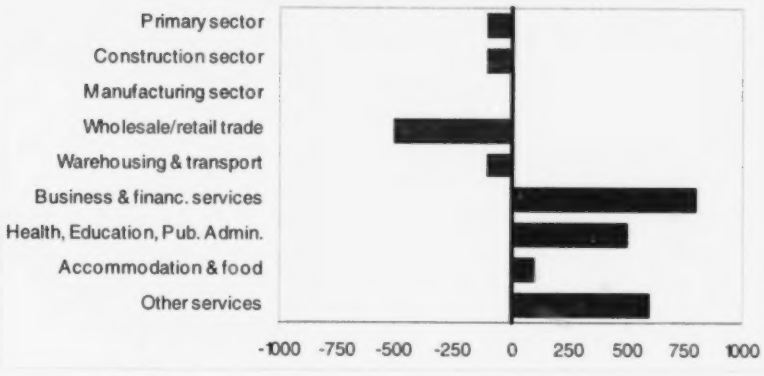


Source: Statistics Canada

The *All-Items Consumer Price Index* for Prince Edward Island rose by 2.7 per cent in 2002, compared to 2.2 per cent nationally. Energy prices were on average 4.8 per cent lower in 2002, though as Diagram 6 shows, the national and provincial energy price indexes increased from January 2002 to February 2003. Particularly noteworthy is the period March to November 2002, when energy prices rose by 22 per cent on Prince Edward Island compared to a 7 per cent increase nationally. Highest year-over-year price increases for Islanders in 2002 were for motor vehicle insurance premiums, up 39 per cent, and cigarettes, up 29 per cent.

Labour Force

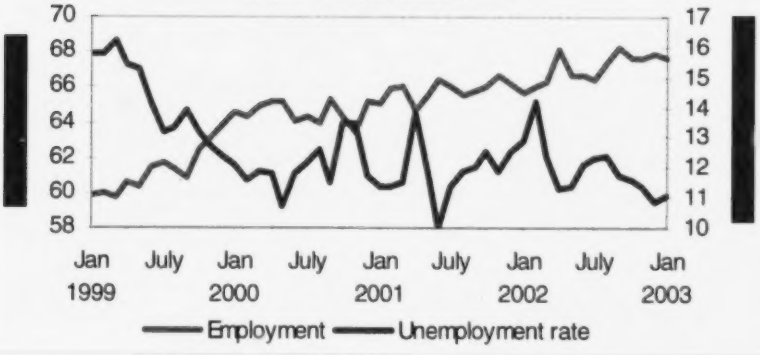
Diagram 7
P.E.I. EMPLOYMENT GROWTH, 2002



Source: Statistics Canada.

Employment on Prince Edward Island rose to 67,100 in 2002, an increase of 1,200 from a year earlier. This was the largest annual number of employed persons ever recorded in Island history. As Diagram 7 indicates, all employment gains occurred in the service-providing sector with the largest increases in the business and financial services sector. Employment in the service-providing sector grew by 2.9 per cent in 2002, while growth in the goods-producing sector fell by 1.1 per cent.

Diagram 8
EMPLOYMENT AND UNEMPLOYMENT RATE
Prince Edward Island



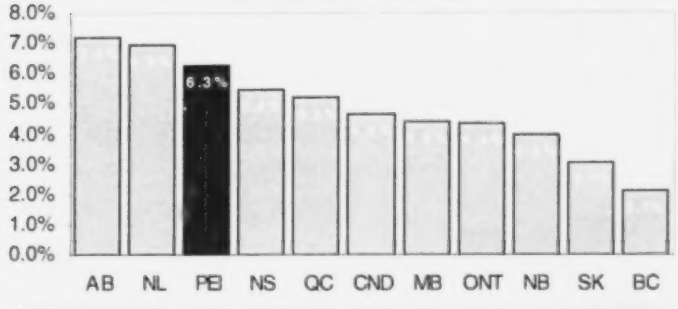
Source: Statistics Canada.

The unemployment rate averaged 12.1 per cent in 2002, compared to 11.9 per cent recorded one year earlier. This increase occurred largely because the labour force participation rate rose from 67.6 per cent in 2001 to 68.2 per cent in 2002. Diagram 8 shows monthly trends in unemployment and employment. The monthly unemployment rate on Prince Edward Island has been trending down since October 1993, when it stood at 19.5 per cent. Diagram 8 also shows the upward trend in employment since 1999.

Income

Statistics Canada estimates that personal income for Prince Edward Island rose from $3,141 million in 2001 to $3,344 million in 2002, an increase of 6.5 per cent. The major contributors to this growth were labour income and net unincorporated non-farm business income.

Diagram 9
LABOUR INCOME GROWTH
Canada and Provinces



Source: Statistics Canada.

Diagram 9 shows labour income growth in 2002 for Canada and the provinces. Prince Edward Island placed third among the provinces with 6.3 per cent growth in total labour income. This compares to a national growth rate of 4.6 per cent. The largest components of personal income for Prince Edward Island in 2002 were labour income (56 per cent), government transfer payments to persons (19 per cent) and income from interest, dividends and other investments (13 per cent).

Federal government transfers to persons are estimated to be 3.8 per cent higher in 2002 due to increases in Canada Child Tax Benefits (CCTB), Canada Pension Plan (CPP) benefits and Employment Insurance (EI) benefits. CCTB payments were valued at $41 million in 2002, while CPP payments totalled $126 million that year. EI benefits paid on Prince Edward Island in 2002 totalled $196.7 million, an increase of 4.2 per cent from 2001. This increase is mainly attributed to a 15.5 per cent rise in the value of fishing benefits.

Statistics Canada estimates that income derived from interest, dividends and other investments has decreased by 7.6 per cent in 2002 as a result of poor market conditions. This negative impact on personal income growth was counteracted to a large degree by net farm income, which rose from an estimated -$23 million in 2001 to an all-time high of $81 million in 2002 as a result of the recovery in the potato sector.

Population

According to Statistics Canada's preliminary estimates, the Island population reached 139,913 [2] on July 1, 2002, an increase of 1,009 persons or 0.7 per cent from 2001. Natural increases, i.e. total births minus total deaths, contributed 24 per cent to this change, while 10 per cent can be attributed to international migration and 66 per cent to interprovincial migration. The majority of persons

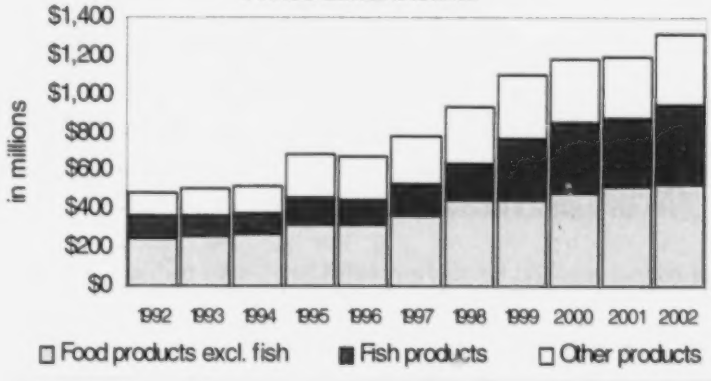
[2] This population estimate is based on the 1996 Census counts adjusted for net undercoverage. This estimate does not take into account the population counts determined by the 2001 Census, which were released on March 12, 2002, and which will result in revisions in the fall 2003.

moving to Prince Edward Island from other provinces came from Ontario, Newfoundland and Nova Scotia. According to the 2001 Census of Population, the majority of immigrants that arrived on PEI between 1996 and 2001 came from Yugoslavia, Croatia, the United States and the United Kingdom. During the last 25 years the Island population increased by 16.6 per cent, which compares to a national growth rate of 32.4 per cent.

Industrial Profiles

Manufacturing

Diagram 10
ANNUAL MANUFACTURING SHIPMENTS
Prince Edward Island



Source: Statistics Canada.

In 2002 the value of total manufacturing shipments was $1,316 million, an increase of 9.5 per cent from 2001. Food shipments, excluding fish products, were $539 million, an increase of 2.4 per cent. Processed fish products, totalling $413.5 million, expanded by 16.2 per cent in value in 2002, while the value of all other manufacturing on Prince Edward Island increased by 14 per cent to reach $363.5 million.

Diagram 10 shows the annual value of provincial manufacturing shipments between 1992 and 2002. Fish products have played an increasingly important role in Island manufacturing, expanding from $113 million in 1992 to $413 million in 2002, an increase of $300 million. In comparison, the value of other food products increased by $286 million during that period, while the value of all non-food manufacturing rose by $239 million.

In 2002 the manufacturing sector provided 9.4 per cent of all employment on Prince Edward Island, making it the second largest private sector employer after the trade sector. The number of employed persons in the manufacturing sector remained the same as in 2001 at 6,300.

Exports

Diagram 11
DISPOSITION OF EXPORTS OF GOODS, 2002
Prince Edward Island

Source: Statistics Canada.

After a 2.4 per cent decline in 2001, Prince Edward Island's export performance of goods in 2002 improved by 1.9 per cent and valued $679.1 million. Fresh and processed food products, valued at $507.7 million, represented about 75 per cent of the value of international exports in 2002, as illustrated in Diagram 11. While the value of internationally exported frozen food products fell by 2.3 per cent in 2002, the value of fish and raw potato exports increased by 28.4 per cent. Other exports in 2002 included $64.6 million in machinery and equipment, $20.1 million in industrial goods, $14.6 million in forestry products, and $72.1 million in other Island-made products.

Agriculture

Total farm cash receipts for Prince Edward Island reached an all-time high of $369.6 million in 2002, an increase of 9.5 per cent from a year ago. Favourable weather conditions during the summer of 2002, following the disastrous 2001 season, resulted in a 57 per cent increase in the harvested potato crop with a volume estimated at 28,890,000 cwts.

Table 1
ANNUAL P.E.I. FARM CASH RECEIPTS, ($ Millions)

Year	Total Crop	Potato	Total Livestock	Cattle	Hog	Dairy	Direct Payments	Total Receipts
1997	155.7	128.8	116.9	29.8	29.2	47.1	8.0	280.6
1998	201.7	173.3	109.5	28.8	20.6	49.5	11.1	322.3
1999	222.2	192.2	106.1	24.8	21.9	49.0	18.7	347.0

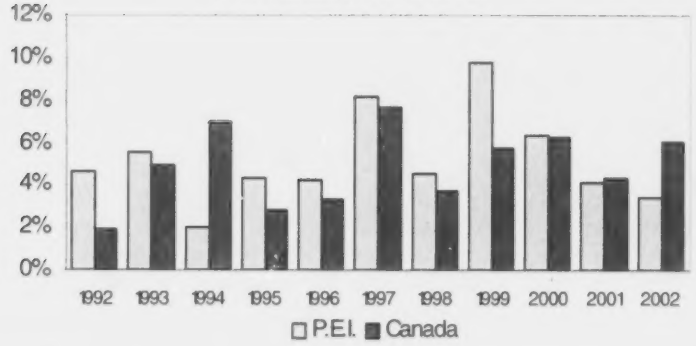
2001	153.6	126.0	125.2	27.3	33.5	52.5	58.5	337.4
2002	227.7	194.2	118.4	25.8	27.6	53.3	23.4	369.6
Percent change 2002/2001	48.3%	54.2%	-5.4%	-5.8%	-17.5%	1.6%	-60.0%	9.5%

Source: Statistics Canada, *Farm Cash Receipts*. cat no. 21-603-XPB

Table 1 shows the recent trends in farm cash receipts by major commodity from 1997 to 2002. The estimated value of $194 million in potato receipts in 2002 set a new record for Prince Edward Island. However, total livestock receipts fell by 5.8 per cent in 2002 as hog and cattle receipts declined. Government support payments to farm operators declined by 60 per cent from 2001, when compensation payments relating to the potato diversion program and increased crop insurance payouts were at an all-time high.

Retail Trade

Diagram 12
RETAIL SALES GROWTH, 1992-2002
PRINCE EDWARD ISLAND



Source: Statistics Canada.

Diagram 12 illustrates growth in retail sales on Prince Edward Island and Canada from 1992 to 2002. In only three years did the nation's growth rate exceed that of PEI Provincial retail sales expanded by 4.2 per cent in 2001 and 3.4 per cent in 2002. This compares to a national growth rate of 4.4 and 6 per cent, respectively. Total retail sales on Prince Edward Island were valued at $1.3 billion in 2002.

The number of new motor vehicles sold on Prince Edward Island totalled 4,996 in 2002, an increase of 7.8 per cent from 2001 compared to a 5.4 per cent decline in 2001. This represents a value of $131.2 million, up 8.7 per cent from 2001.

The wholesale/retail trade sector continues to be the largest private sector employer in the province with 9,500 people employed in 2002. Since 1992 employment in this sector has grown 20 per cent.

Fisheries

The *PEI Department of Fisheries, Aquaculture and Environment* estimates that the value of total fish landings in 2002 fell by 0.4 per cent to $164.3 million. Snowcrab and bluefin tuna quotas increased in 2002, but herring landings declined by 21 per cent to 34 million pounds due to quota reductions. The value of pelagic and estuarial catches was 9.4 per cent lower than in 2001, while the proceeds from molluscs and crustaceans other than lobster was at par with last year's value.

The value of groundfish landings was 31 per cent lower. The 2002 lobster catch of 19.9 million pounds was slightly higher than a year earlier. Total revenue from lobster landings rose 0.5 per cent in 2002 to an all-time record value of $105.4 million as a result of strong prices.

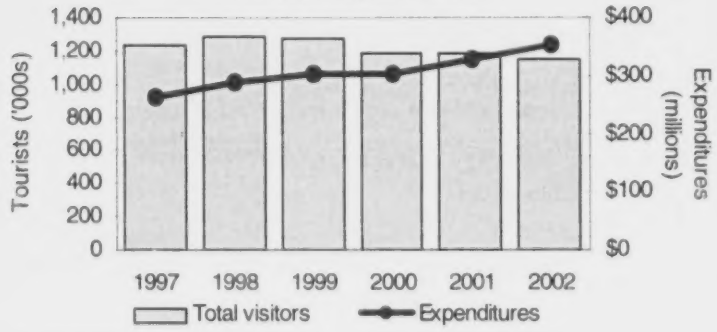
Forestry

The *PEI Department of Agriculture and Forestry* estimates that the volume of primary forest products rose by 8.8 per cent, from 703,572 cubic metres in 2001 to 765,759 cubic metres in 2002. The total volume of wood harvested on Prince Edward Island rose from 417,759 cubic metres in 2001 to 460,650 cubic metres in 2002, an increase of 10.3 per cent. Industrial wood production rose by 9.6 per cent in 2002, while the production of fuel wood and fuel chips rose by 5.7 per cent. According to Statistics Canada, wood industry shipments were valued at $60 million in 2002, up 14.1 per cent from 2001.

The Canada-U.S. softwood lumber dispute had little direct effect on Island production, since Prince Edward Island is exempt from the countervailing duty imposed on the four major lumber-producing provinces – British Columbia, Alberta, Ontario and Quebec, where softwood is primarily harvested on crown lands. Most Island softwood is harvested on private land.

Tourism

Diagram 13
SUMMARY STATISTICS: TOURISM
Prince Edward Island



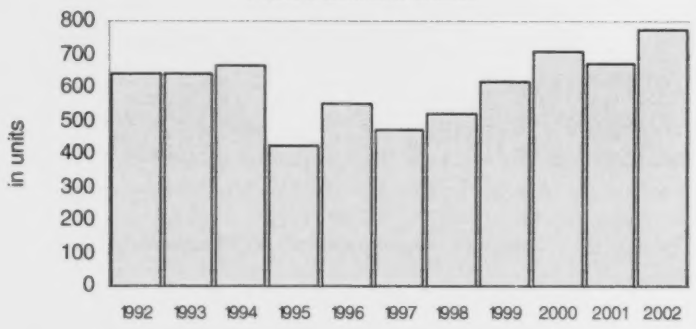
Source: P.E.I. Department of Tourism.

Diagram 13 shows that the number of persons that visited the Island for pleasure or business has been in decline since 1998, while their spending has been trending upward. According to the *PEI Department of Tourism*, between May and October 2002 an estimated total of 1.1 million pleasure tourists and 45,417 business visitors spent a total of $353 million while vacationing or conducting business on Prince Edward Island. This is a 3 per cent decrease in visitor numbers, while tourism revenue rose by 7.5 per cent from 2001, according to Tourism PEI.

In 2002, pleasure visitors accounted for about 96 per cent of all visits, with 75 per cent coming from Canada and 22 per cent originating in the United States. Ontario continued to provide the largest share of pleasure visitors in 2002 at 27 per cent, followed by Nova Scotia at 20 per cent and New Brunswick at 10 per cent. The number of pleasure visitors from the United States was 0.5 per cent higher in 2002 than in 2001.

Construction and Investment

Diagram 14
HOUSING STARTS
Prince Edward Island



Source: Statistics Canada and Canada Mortgage and Housing Corp.

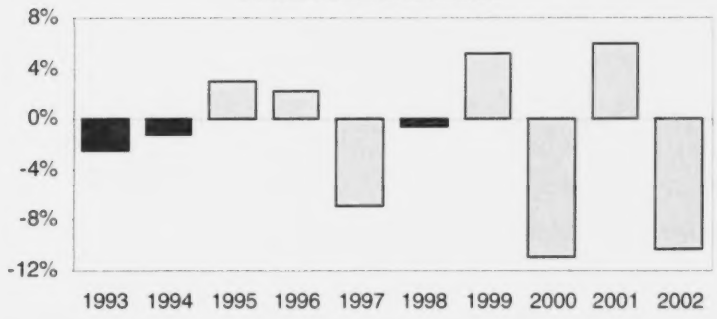
In 2002 Prince Edward Island experienced a residential housing boom as illustrated in Diagram 14, which shows the total number of housing starts since 1992. Housing starts reached a 13-year high of 775 units, an increase of 15 per cent from 2001. In contrast, non-residential construction declined in 2002, as illustrated by the fact that non-residential building permits in 2002 were valued at $47 million, 70 per cent below the record-breaking high of $152.9 million recorded in 2001.

Statistics Canada estimates the value of private and public investment for Prince Edward Island in 2002 to be $652.4 million, an increase of 9.2 per cent compared to 2001. The value of construction rose by 8.3 per cent in 2002, while the value of investment in machinery and equipment increased by 10.5 per cent.

Transportation

Prince Edward Island has several transportation links to the mainland: the Confederation Bridge; the *Marine Atlantic* ferry service from Souris, PEI to the Magdalen Islands; *Northumberland Ferries* between Wood Islands, PEI and Caribou, NS; the Charlottetown Airport; and the ports of Charlottetown, Summerside, Souris and Georgetown. Most visitors to the Island travel across the privately owned Confederation Bridge. According to estimates provided by the *PEI Department of Transportation and Public Works*, a total of 1.6 million vehicles crossed the Confederation Bridge in both directions in 2002, up 3 per cent from 2001.

Diagram 15
AIR PASSENGER GROWTH
Prince Edward Island



Source: P.E.I. Dept. of Transportation and Public Works.

As Diagram 15 indicates, growth in the number of passengers using the Charlottetown Airport has been quite volatile over the last 10 years. Re-structuring of the airline industry has affected air passenger traffic during the last few years. In 2002 a total of 158,746 travellers passed through the airport, down 10 per cent from the previous year.

The ferry service between Prince Edward Island and the Magdalen Islands, Quebec, carried 17.4 per cent more passengers in 2002, while vehicle traffic was up by 14.8 per cent. The number of passengers taking the PEI to Nova Scotia ferry service was up by 0.7 per cent, while the number of vehicles ferried across was up by 1.7 percent from 2001.

The Public Service Sector

In 2002, the public service sector, i.e., federal/provincial/municipal public administration, educational services, and health and social services, accounted for 27 per cent of provincial GDP at factor cost and 28 per cent of total Island employment. According to Statistics Canada, real public sector GDP at factor cost rose from $800 million in 2001 to $817.5 million in 2002, an increase of 2.2 per cent, at par with growth in 2001.

According to Statistics Canada's *Survey of Employment, Earnings and Hours* (SEPH), employment in public administration (federal, provincial and municipal) decreased by 2.6 per cent in 2002. Education services experienced job growth of 2.7 per cent in 2002, while the health and social services industry showed virtually no job growth.

Provincial Finances

In fiscal year (FY) 2001/02, total revenue received for the Province of Prince Edward Island was $973.6 million, up 2.3 per cent from 2000/01. Provincial tax revenues increased to $459.7 million in FY 2001/02, which is a 4.1 per cent improvement from FY 2000/01. Equalization payments increased by 4.4 per cent from 2001, to value $282.3 million, while CHST payments advanced 15.9 per cent to total $88.9 million. Total federal transfers to Prince Edward Island contributed 41 per cent to the province's total revenue. Total expenditures increased by 2 per cent to reach $981.9 million. According to the PEI Public Accounts' *Operating Fund*, the deficit for FY 2001/02 was $17 million after pension adjustment, compared to $11.6 million in FY 2000/01. As of 31 March, 2002, the net debt was $1,053 million, up 1.6 per cent from 2001. Diagram 16 illustrates the decline in the province's Net Debt-to-GDP ratio since 1995.

Average number of children per family [3]	1.3	1.2	1.1	1.2

Totals may not equal the sum of the components due to rounding.

Note 1: This table reports raw Census information. Statistics Canada's adjusted total population figure for Prince Edward Island in 2001 was 138,904.

Note 2: For historical and statutory reasons, shelter occupancy on Indian Reserves does not lend itself to the usual classification. Therefore, in 1991 a special category *Band Housing* was created.

Note 3: The average number of children per family is calculated using the total number of children at home and the total number of census families.

6 persons	$29,087	$22,997	$29,877	$23,622	$30,640	$24,225	$31,324	$24,766
7 or more persons	$31,857	$25,188	$32,722	$25,872	$33,558	$26,533	$34,308	$27,126

Notes: Urban area data are based on an area of residence between 30,000 and 99,999 persons.

Low income cut-offs (LICOs) are quite different from measures of poverty and Statistics Canada does not endorse their use as such. LICOs are used to delineate family units into "low income" and "other" groups. A family unit with income below the cut-off for its family size and urbanization classification is considered a low income family. Any family with income equal to or above the cut-off is considered in the "other" category.

Notes: *Single-detached* is a one-dwelling unit completely separated on all sides.

Semi-detached includes each one of two dwellings separated by a common wall extending from ground to roof, or by a garage. Linked houses were included in this category prior to 1982, but are now included with *single-detached*. Similarly, duplexes which are described as double dwellings, one above the other are now included with the category *Apartments and others*.

Row housing comprises single-attached houses in a row of three or more dwellings. Row duplexes are not included in this category but are classified under *Apartments and others*.

Apartments and others includes dwelling units found in a wide range of structures such as: duplexes, double-duplexes, triplexes, row-duplexes, apartments proper, and dwellings over, or at the back of, a store or other non-residential structure.

r: revised data

2002 data not available at time of publication.

Notes: *Private Individuals and Others* includes credit owed to: supply and finance companies, dealers, stores, private individuals and other unclassified credit sources.

For those institutions providing data based on fiscal year ending March 31, the debt outstanding at that time is used to represent the debt at December 31 of the previous year.

Advance Payments Programs were taken out of the cash receipts estimates from 1971 to date and moved to the debt outstanding series. These payments are a type of loan made to farmers since no transaction occurs at the time of the advance. Estimates are derived from data supplied by the Canadian Wheat Board and Agriculture Canada.

Note 1: Children in care refers to children who are in custody or guardianship of the Director of Child Welfare via voluntary agreement or court-sanctioned order. These children live in foster care homes, group homes or other custodial care arrangements approved by the Director. The age range for this group is from newborns to 18 years of age.

Note 2: Active number of children in care - refers only to the current number of children that are in the custody or guardianship of the Director of Child Welfare at the end of the Fiscal Year (April 1 - March 31).

Note 3: Total number of children in care - refers to the total number of all children who have been in the custody or guardianship of the Director of Child Welfare during the entire fiscal year (April 1 - March 31). It includes a count of ALL children in care that year and hence will always be higher than the active number.

Note 4: Total number of children in care days - refers to the number of days that children resided in the custody or guardianship of the Director of Child Welfare during the entire fiscal year in foster care homes, group homes, or other approved residences.

Bed capacity per '000 population [7]	11.7	11.7	11.7	11.7	11.7	11.5	11.3

n.a.: data not available.

Note 1: The number of practising, full-time equivalent, physicians reported for 2002 does not include locum services or out-of-province physician services. Data prior to 1999 included some locum services.

Note 2: Effective 1998, *Total bed utilization* includes in-province and out-of-province beds, acute beds, nursing homes, and other.

Note 3: Effective 1998, *Active treatment hospitals* have been re-classified as *Acute care hospitals*. From 1998 to 2001, nine *other insured beds* were added to the *Provincial Acute Care* totals of 474 for a total of 483. For 2002 the *Acute Care Hospital* totals exclude the *nine other insured beds* which are included in *Other Institutions*.

Note 4: Effective 1998, *Manors* are no longer included under *Other institutions*, but are re-classified under *Nursing homes*. This includes 11 respite beds in *Manors*.

Note 5: Up to 1997, *Other institutions* included Manors, Hillsborough Hospital, Prince Edward Home, Stewart Memorial Hospital, and Community Hospital.

Note 6: 85 Prince Edward Home beds are included under *Public (manors)*.

Note 7: *Bed capacity per 1000 population* calculated using *Total bed utilization*.

Out-of-province (28 beds) [4]	*13.9*	*13.9*	4.3	*99.95*	*3.8*

* GHE: Gross Hospital Expenditures OAE: Operating Account Expenditures

Note 1: Expenditures for all years have been recast to re-allocate physician remuneration dollars from Table 90 *Acute Care Hospitals)* and to include them in Table 91 *(Physician Services)*.

2: *Operating Account Expenditures* is the funding provided by Government to Acute Care Hospitals. With respect to in province Acute Care Hospitals OAE equals GHE minus Hospital Revenues.

3: The number of In-province Acute Care beds includes only those located in the seven hospitals while the two previou years shown included an additional 9 insured beds, which are located in other institutions.

4: The number of beds refer to Acute Care only, while the expenditures include in-patient as well as outpatient use of Acute Care facilities
